

Monitoring:

1. IEM GTR L (wireless)
2. IEM GTR R (wireless)
3. IEM VOX L (wireless)
4. IEM VOX R (wireless)
5. IEM BASS (wired)
6. IEM DRS (wired)
7. IEM KBD (wired)
8. 2 x WEDGE (linked together, for spare / fail safe)

We bring our own IEM's + lead singer's wireless microphone and receiver.

Wireless units (we bring these):

- 2 x Sennheiser ew IEM G4 (A-band, 516 - 558 MHz)
- 1 x Sennheiser ew 100 G4-935-S (GB-Band, 606 - 648 MHz)

Stage:

Stage must be sturdy, evenly flat and protected from water or other liquids, strong winds, falling objects and audience - it must be a safe place to work! Size should be at least 5 x 4 metres (quintet) or 6 x 4 metres (sextet).

Miscellaneous:

If the client / venue provides the technicians we'll gladly use the house PA and lights - if they are of good quality. We can also bring our own PA (max ~250 pax) and stage lighting + hazer / fog machine if needed.

We normally need about 2 hours for load in, setup and soundcheck. Load out takes around 1 hour.

We don't bring our own technicians unless otherwise agreed.

It would be super nice if there was a free parking space available for our van in the immediate vicinity of the venue. The van is a bit over 6 metres long so it won't fit in normal parking slots.

Don't hesitate to contact! Soittele jos kysyttävää!
